PROFESSIONAL SUMMARY

M.Sc. Mathematics graduate trained in Data Science (AI/ML), aspiring Junior Data Engineer with hands-on experience in Python, SQL and relational databases (MySQL, SQLite). Strong in Data Structures and Algorithms (DSA) and problem solving, with practical skills in data cleaning, transformation, validation and database integration through end-to-end projects. Over three years of experience managing and cross-checking large volumes of academic data for accurate reporting. Certified by Google, IBM, Packt and Anthropic. Available to join immediately and open to relocating to Mohali.

SKILLS

Programming Languages: Python
Data Analytics Frameworks: NumPy, Pandas, Matplotlib, Seaborn
AI & ML: PyTorch, TensorFlow
NLP: NLTK, Text Preprocessing, Lemmatization, Stemming
Core CS & Mathematics: Basic Data Structures and Algorithms (Python), Statistics, Linear Algebra, Calculus
Databases & Tools: MySQL, SQLite, Git, GitHub

AI/ML PROJECTS

Hospital Management Chatbot and Database System | Python, MySQL, Streamlit, NLTK, Joblib
GitHub: github.com/jensunni/hospital_chatbot Aug - 2026

- Designed and integrated a MySQL database for patient records and appointment schedules, queried from a Python application; enforced a unique key to block double bookings.
- Implemented UUID-based session tracking, Joblib caching for faster repeated lookups, and in-app analytical charts for reporting.
- Built an NLP chatbot (NLTK, scikit-learn; compared 4 models) with a Streamlit interface for patient queries and appointments.

AI-Powered Online Exam Invigilator | Python, SQLite, OpenCV, MediaPipe, YOLO, Streamlit, FFmpeg
GitHub: github.com/jensunni/Computer_Vision_Project Sep - 2026

- Built a computer-vision proctoring pipeline for webcam and CCTV (RTSP) feeds using MediaPipe, OpenCV solvePnP head-pose and YOLO + ByteTrack, flagging 9 alert types for human review.
- Designed a 3-table SQLite schema (sessions, recording sources, events) with parameterized queries and automatic schema migration; each event stores a snapshot, evidence clip, review priority and reviewer decision.
- Cut false alarms with duration rules, cooldowns and per-student calibration; ran FFmpeg recording as a separate process so analysis failures never stop recording.
- Developed a Streamlit review dashboard with filters, 5 s pre / 10 s post evidence clips and reviewer decisions.

WORK EXPERIENCE

Data Science Intern (AI/ML) | SMEC Technologies, Kochi, Kerala | May 2026 – Nov 2026

- Engineered and evaluated machine learning models using Python and scikit-learn, optimizing a TF-IDF sentiment classifier on 350,000+ customer reviews and a Random Forest regressor to analyze bank marketing data.

- Architected and deployed an end-to-end NLP chatbot by integrating a structured MySQL database backend with an interactive Streamlit web interface to streamline user data querying.

Assistant Professor in Mathematics (Contract) | Sacred Heart College, Kochi | Jul 2024 – Mar 2026

- Managed and cross-checked large volumes of academic and performance data, resolving discrepancies to deliver accurate reporting.
- Explained complex quantitative concepts clearly and coordinated with stakeholders across departments.

Assistant Professor in Mathematics (Contract)|College of Engineering Kidangoor, Kerala|Nov 2022 – Apr 2024

- Taught mathematics to engineering students and maintained organized evaluation records for departmental reporting.

EDUCATION

M.Sc. Mathematics, Mahatma Gandhi University, Kottayam *2020*

B.Sc. Mathematics, Mahatma Gandhi University, Kottayam *2018*

CERTIFICATIONS & ACHIEVEMENTS

- Foundations of DSA in Python (Packt, Coursera), Oct 2026
- Data Fundamentals (IBM SkillsBuild)
- Introduction to AI and Discover the Art of Prompting (Google, Coursera)
- Claude 101 (Anthropic)
- Participant, SMEC Technologies Hacking Challenge, Sep 2026

LANGUAGES

English, Malayalam
