PROFESSIONAL SUMMARY

AI/ML engineer with an M.Sc. in Mathematics and hands-on training in machine learning, NLP and data analysis. Built and compared classification and regression models in scikit-learn, including a TF-IDF sentiment classifier trained on 350,000+ customer reviews and a Random Forest regressor on bank marketing data, and delivered an NLP chatbot on a MySQL backend with a Streamlit interface. Strong foundation in statistics, linear algebra and calculus, with data structures and algorithms in Python. Currently a Data Science (AI/ML) Intern at SMEC Technologies, seeking the Product Engineer (AI/ML) role at Gritstone.

SKILLS

Programming Languages: Python

Data Analytics Frameworks: NumPy, Pandas, Matplotlib, Seaborn

AI & ML: PyTorch, TensorFlow

NLP: NLTK, Text Preprocessing, Lemmatization, Stemming

Core CS & Mathematics: Basic Data Structures and Algorithms (Python), Statistics, Linear Algebra, Calculus

Databases & Tools: MySQL, SQLite, Git, GitHub

AI/ML PROJECTS

Customer Review Sentiment Classification (NLP) Aug - 2026

Python, Pandas, NumPy, NLTK, scikit-learn, Matplotlib, Seaborn

- Cleaned and preprocessed 357,698 Ola customer reviews (removed nulls, duplicates, URLs, emojis and stop-words while keeping negation words, then lemmatized) and derived 3-class sentiment labels from star ratings.
- Trained and compared 4 models on TF-IDF features (25,000 uni gram and bi gram terms) with a stratified 80/20 split: Logistic Regression, LinearSVC, Multinomial Naive Bayes and Random Forest. LinearSVC performed best with 87.9% accuracy and 0.88 weighted F1.
- Detected a bias issue where customer surnames ranked among the top sentiment predictors; built a name block-list (about 57,000 tokens), removed names from the text and verified the fix by re-inspecting the top model features.

Bank Marketing Customer Age Regression Jul- 2026

Python, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn

- Performed exploratory analysis on 45,211 bank customer records (17 features) to profile age against job, marital status, balance and loan behavior, supporting product targeting by age group.
- Compared 6 regression models (Decision Tree, SVR, Ridge, Lasso, Elastic-net, Random Forest) on MAE, RMSE and R-squared; Random Forest was best with MAE 6.43, RMSE 7.99 and R-squared 0.44.

Customer Review Text Analytics (NLP) Aug - 2026

Python, Pandas, NLTK, scikit-learn, Matplotlib

- Built an NLTK text-cleaning pipeline (lowercasing, noise removal, stopword removal with negation words kept, lemmatization) on 21,000+ Amazon customer reviews.
- Used CountVectorizer n-gram analysis (unigram, bigram, trigram) to surface the main customer complaint themes, such as customer service, which was the most frequent bigram with 9,110 mentions.

WORK EXPERIENCE

Data Science Intern (AI/ML) | SMEC Technologies, Kochi, Kerala | May 2026 – Present

- Engineered and evaluated machine learning models using Python and scikit-learn, optimizing a TF-IDF sentiment classifier on 350,000+ customer reviews and a Random Forest regressor to analyze bank marketing data.
- Architected and deployed an end-to-end NLP chatbot by integrating a structured MySQL database backend with an interactive Streamlit web interface to streamline user data querying.

Assistant Professor in Mathematics (Contract) | Sacred Heart College, Kochi | Jul 2024 – Mar 2026

- Managed and cross-checked large volumes of academic and performance data, resolving discrepancies to deliver accurate reporting.
- Explained complex quantitative concepts clearly and coordinated with stakeholders across departments.

Assistant Professor in Mathematics (Contract)|College of Engineering Kidangoor, Kerala|Nov 2022 – Apr 2024

- Taught mathematics to engineering students and maintained organized evaluation records for departmental reporting.

EDUCATION

M.Sc. Mathematics, Mahatma Gandhi University, Kottayam *2020*

B.Sc. Mathematics, Mahatma Gandhi University, Kottayam *2018*

CERTIFICATIONS & ACHIEVEMENTS

- Foundations of DSA in Python (Packt, Coursera), Oct 2026
- Data Fundamentals (IBM SkillsBuild)
- Introduction to AI and Discover the Art of Prompting (Google, Coursera)
- Claude 101 (Anthropic)
- Participant, SMEC Technologies Hacking Challenge, Sep 2026

LANGUAGES

English, Malayalam
